

# March 7, 2014 – Legislative Update

## Spotlight for the Week:

**HB 2072:** Filed in the Missouri House by Representative Jeff Messenger.

HB 2072 Specifies that no economic incentive programs may provide public monies or benefits to research projects involved with abortion services, human cloning, or prohibited human research. Missouri Right to Life strongly supports HB 2072.

Thank you Representative Jeff Messenger and all those who signed on as co-sponsors to HB 2072! Thank you for seeing the need for this important life-saving legislation! We look forward to working with you to get this important legislation passed and sent to the Governor's desk.

## Missouri Right to Life Priority Legislation

### Status: GOOD NEWS!

**HB 1478 was heard in the House Health Care Policy Committee, Thursday, March 6**

**We thank the Chairman of the House Health Care Policy Committee, Rep. (Dr.) Keith Frederick for hearing this important life-saving bill! We look forward to the committee moving this bill to the House floor for debate very soon.**

**Due to the weather last week: SB 770 has been re-scheduled for a hearing in the Senate Judiciary and Civil and Criminal Jurisprudence Committee, Monday, March 10**

**SB 770 and HB 1478** will place in statute stricter inspection requirements and more accountability for abortion clinics. It will establish statutory requirements rather than relying solely on regulations for oversight of abortion clinics and will be less subject to the agenda of a particular agency or political party.

Atrocities at abortion clinics in Pennsylvania and Texas and multiple violations of health requirements at the St. Louis Planned Parenthood facility where there have been multiple 911 calls over the last 4 years illustrate the need for this legislation.

We thank Senator Wayne Wallingford, Sponsor of SB 770 and Representative Kathryn Swan, Sponsor of HB 1478 and all the co-sponsors for working to move this important life-saving legislation forward and help get it to the Governor's desk. HB 1478 has over 100 co-sponsors.

MRL turned in testimony in opposition to both HB 1310 and HB 1236. HB 1236 never had a separate presentation in the hearing. ### **Budget Bills**

As the budget moves through the process over the next 2 months, Missouri Right to Life supports continued funding for the Alternatives to Abortion Program. This important program provides funding for pregnancy resource centers and maternity homes. These programs help women in crisis pregnancies through difficult situations and works to help them choose life for their unborn babies.

We are also looking at ways to have more accountability for our federal tax dollars that are going to Planned Parenthood.

Missouri Right to Life will also once again be seeking pro-life protections on the Department of Economic Development Budget Bill to ensure that public monies are not used to fund or subsidize human cloning or embryonic stem cell research.

Budget bills are moving through the hearing process and will soon be moving to the House floor. Budget bills must be truly agreed and finally passed by the end of the day on May 9, 2014 this session.

### **Movement on Pro-Life Legislation: NOTE: Last Day of Session is Friday, May 16 at 6:00 p.m.**

Missouri Right to Life watches each piece of legislation for changes in language that would change the status of our support or opposition at any point in the process.
